Cursor, Claude code, Augment code, Windsurf, Copilot, Chatgpt, Gemini

WORK EXPERIENCE

Senior Full Stack Developer

Betrnk Tours (BGC Taguig City)

February 5, 2024 - Current

- Built full-stack applications using Laravel for backend and React/Next.js for frontend.
- Designed and managed RDBMS solutions to support scalable and reliable systems.
- Implemented multi-tenant architectures for web applications.
- Designed and deployed microservices architectures using HTTP APIs for synchronous operations and RabbitMQ for asynchronous communication.
- Wrote and maintained unit tests with Pest and end-to-end tests with Playwright to ensure application quality.
- Trained and mentored new developers to accelerate onboarding and skill growth.
- Managed in-house and outsourced projects from conception to deployment.
- Oversaw repository management, ensuring proper version control and adherence to best practices.
- Conducted and managed technical interviews for developer applicants.

Junior Full-Stack developer

Halcyon Agile (Mandaluyong)

June 25 2022 - January 31 2024

- Collaborated in the development of Content Management Systems (CMS), eCommerce websites, and Service Marketplace websites.
- Utilized ReactJS/NextJS, Node.js, and Laravel to create dynamic and responsive web applications.
- Implemented SCRUM Agile methodologies to ensure efficient project management and timely delivery of high-quality solutions. Applied principles of Relational Database Management System (RDBMS) to design and maintain an effective MySQL database structure, ensuring optimal performance for the specific needs of the service-focused platform. Demonstrated proficiency in version control using Git, enabling seamless collaboration and tracking of code changes.

MY EDUCATION HISTORY

2018 - 2022 Bachelor Of Information Technology

Bulacan State University, Bustos, Bulacan

2016 - 2018 Information Communication Technology

ACLC College Baliuag, Bulacan
