WORK EXPERIENCE

June 27 2022 - January 31 2024

Halcyon Agile

Mandaluyong City

Junior Web Developer

- Collaborated in the development of Content Management Systems (CMS), eCommerce websites, and Service Marketplace websites.
- Utilized ReactJS/NextJS, Node.js, and Laravel to create dynamic and responsive web applications.

- Implemented SCRUM Agile methodologies to ensure efficient project management and timely delivery of high-quality solutions. Applied principles of Relational Database Management System (RDBMS) to design and maintain an effective MySQL database structure, ensuring optimal performance for the specific needs of the service-focused platform Demonstrated proficiency in version control using Git, enabling seamless collaboration and tracking of code changes.

February 5, 2024 - Current

Betrnk Tours

BGC Taguig City

Senior Full Stack Developer

- Full-Stack Development: Proficient in Laravel for backend and React/Next.js for frontend.
- Database Engineering: Designing and managing RDBMS solutions for scalable applications.
- Multi-Tenancy Applications: Expertise in creating multi-tenant architectures for web applications.
- Microservices Architecture: Designing and implementing microservices using HTTP APIs for synchronous operations and RabbitMQ for asynchronous communication.
- Automation Testing: Skilled in writing and maintaining unit tests using Pest and end-to-end tests using Playwright to ensure application reliability and quality.
- Developer Training: Experience in training and mentoring new developers.
- Project Management: Managing in-house and outsourced projects from conception to deployment.
- Repository Management: Managing repositories for organizational projects, ensuring version control and best practices.
- Technical Interview Management: Conducting and managing technical interviews for developer applicants.
